

Your payment terminal as a top-up point  
for prepaid mobile phones

## Make the most of your payment terminal

**SIX Multi Solutions offers you with Mobile Voucher exclusively a new, attractive service that is free of charge: the sale of call credits for mobile phones via your payment terminal.**

Users of prepaid mobile phones can now load their call credits even more easily and everywhere without scratch calls – at the cashier in stores, newsagents, restaurants, refueling stations or even at the discotheque.

With Mobile Voucher you profit from a welcome added source of revenue, because for each call credit purchased we credit you up to CHF 5.50. This supplemental service can help you finance your payment terminal.

**“30 francs for my mobile phone please”**

Around 3.5 million people, or over 40 per cent, of all mobile phone users in Switzerland, have prepaid mobile phones. More than 1.2 billion francs of call credits are loaded on these phones each year. This has long been done using scratch cards – but now with Mobile Voucher it can be done directly through your payment terminal. Soon you will also hear at the cashier: “... and 30 francs top-up as well please.”

### Here's how it works

Enter the amount to be loaded in your payment terminal along with the telecom provider. It will automatically generate the Mobile Voucher with the code used to activate the call credits. Customers pay for the voucher along with their other purchases, with either a card or cash. We take care of the billing with the telecom company. The credits sold will be charged to your corresponding account and settled along with the card turnover. At the same time we will credit you with the commissions you have earned.

### No costs, no effort

You obtain the call credits over your payment terminal and only when the customer requests them. This means you need not maintain a supply of scratch cards for the various telecom providers, nor prefinance the call credits, nor set up an additional payment terminal.

Hardturmstrasse 201

## Mobile Voucher at a glance

Mobile Voucher from SIX Multi Solutions replaces the scratch card for prepaid mobile phones. It offers advantages for both the sales outlet and the customer:

- Attractive commission for you
- Additional turnover without extra administrative work or cost
- No prefinancing of call credits
- No physical storage and thus no risk of theft
- No additional terminal needed to process call credits
