

## Mobile Voucher

### Your payment terminal as a top-up point for prepaid mobile phones

#### The service at a glance

Around 3.5 million, or over 40 per cent, of all mobile phone users in Switzerland have practical prepaid mobile phones. Over 1.2 billion francs of call credits are loaded on these phones each year, until now using scratch cards. But now call credits can also be purchased through payment terminals. Mobile Voucher is an ideal, free supplemental service for mobile phone users which at the same time generates welcome additional turnover for you: SIX Multi Solutions credits you with a commission for every call credit sold.

#### The advantages

- Attractive commission for you
- Additional turnover without administrative efforts and costs
- No prefinancing of call credits
- No physical storage and thus no risk of theft
- No additional terminal needed for the processing of call credits

#### Here is how the sales and transaction process works

- 1 The customer wishes to load his or her prepaid mobile phone with a call credit. To do so, he/she tells the cashier which telecom provider is used and the desired call credit amount. The preferred product is chosen on the payment terminal by pressing a combination of keys.
- 2 The SIX Card Solutions payment terminal starts the Mobile Voucher request.
- 3 Our server transmits the Mobile Voucher code to the terminal and simultaneously registers the transaction for billing.
- 4 The customer now pays for all the merchandise (mixed purchase also possible) with a card or with cash.
- 5 The Mobile Voucher with the code is issued through the terminal or cash register printer.
- 6 With the Mobile Voucher, the customer can activate the new call credits on his/her mobile phone by entering the code.
- 7 We take care of the billing with the corresponding telecom provider.
- 8 The total of the call credits sold will be charged to you daily on to the corresponding account, per telecom company. At the same time, the commission will be credited per telecom company. Payment of the net amount is made upon settlement of the generated card turnover.

**MOBILE VOUCHER**

Hardturmstrasse 201  
8021 Zurich

Date: 01.01.2009 Time: 12.00
